Nature and Extent of Confidentiality: The Commission will consider the potential confidentiality of any information submitted, particularly where public release of such information could raise security concerns (e.g., granular location information). We expect, however, that the public interest in knowing whether a carrier uses or owns equipment or services from Huawei or ZTE would significantly outweigh any interest the carrier would have in keeping such information confidential. Respondents may request materials or information submitted to the Commission or to the Administrator be withheld from public inspection under 47 C.F.R. § 0.459 of the Commission's rules.

Needs and Uses: The Commission will submit this new information collection to the Office of Management and Budget (OMB) under their emergency processing procedures. Under this

information collection, the Commission proposes to collect information to determine the extent to which potentially prohibited equipment exists in current networks and the costs associated with removing such equipment and replacing it with equivalent equipment. The Communications Act of 1934, as amended, requires the “preservation and advancement of universal service.” 47 U.S.C. § 254(b). The information collection requirements reported under this collection are the result of Commission actions to promote the Act’s universal service goals. On November 22, 2019, the Commission adopted a Report and Order, Further Notice of Proposed Rulemaking, and Order, WC Docket No. 18-89, FCC 19-121 (*Protecting Against National Security Threats to the Communications Supply Chain Through FCC Programs*). The *Report and Order* prohibits future use of Universal Service Fund (USF) monies to purchase, maintain, improve, modify, obtain, or otherwise support any equipment or services produced or provided by a company that poses a national security threat to the integrity of communications networks or the communications supply chain. It also initially designates two entities – Huawei Technologies Company (Huawei) and ZTE Corporation (ZTE), along with their affiliates, subsidiaries, and parents – as covered companies posing such a national security threat. In the *Further Notice*, the Commission proposes to make the requirement to remove covered equipment and services from carriers’ networks contingent on the availability of a funded reimbursement program, in an effort to mitigate the impact on affected entities. The information will guide the Commission’s next steps in the underlying proceeding.

Federal Communications Commission.
